

Japonia vazuta prin ochii unui horticultor

Prof. dr. Adrian Asănică · Facultatea de Horticultură, USAMV București

3 octombrie 2026

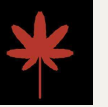

01

Bonsai-an international art form

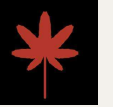

Grădina ca peisaj miniatural și spațiu de contemplare

Bonsai-living art-Gradina Botanica din Kyoto

IHC2026 related exhibition

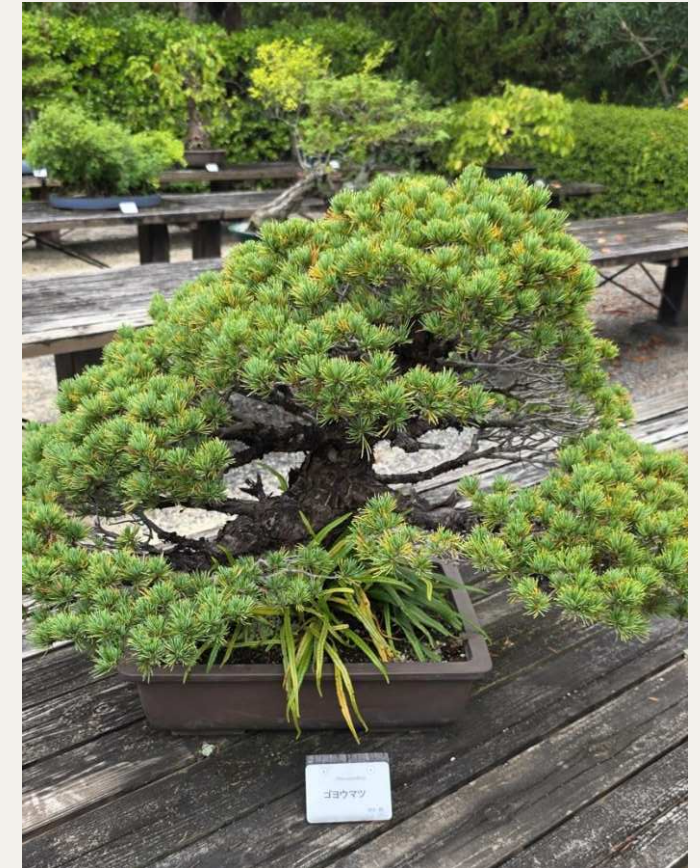

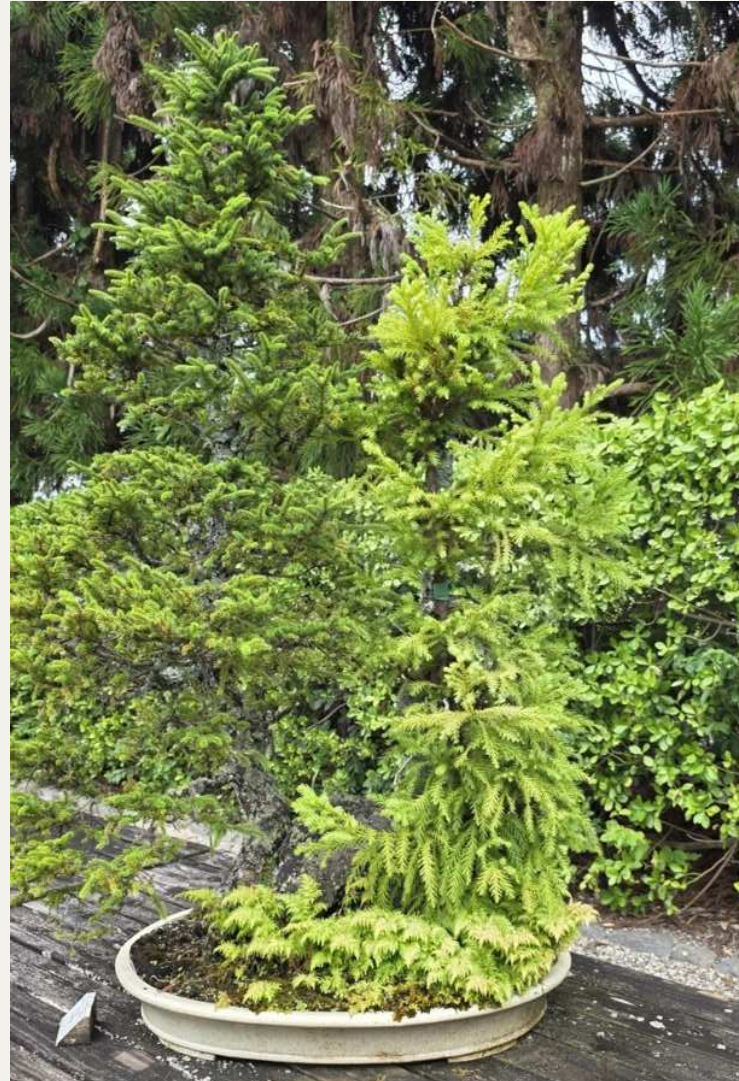

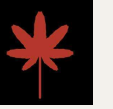

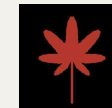

Bonsai varietati tipice

Bonsai cu mai multe specii sau plante in vas

Bonsai din *Actinidia arguta*

02

Natura în detaliu

Grădina ca peisaj miniatural și spațiu de contemplare

Grădina ca peisaj în miniatură

- Peisajul natural este redus la esență: munți, insule, cascade și mare.
- Asimetria conferă echilibru dinamic.
- Spațiul gol (ma) este la fel de important ca elementele plantate.

**Totul reincepe,
are continuitate**

**Dintr-un ciot ?
Da imparate !**

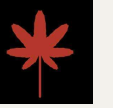

Tehnica de juvenilizare prin drajoni

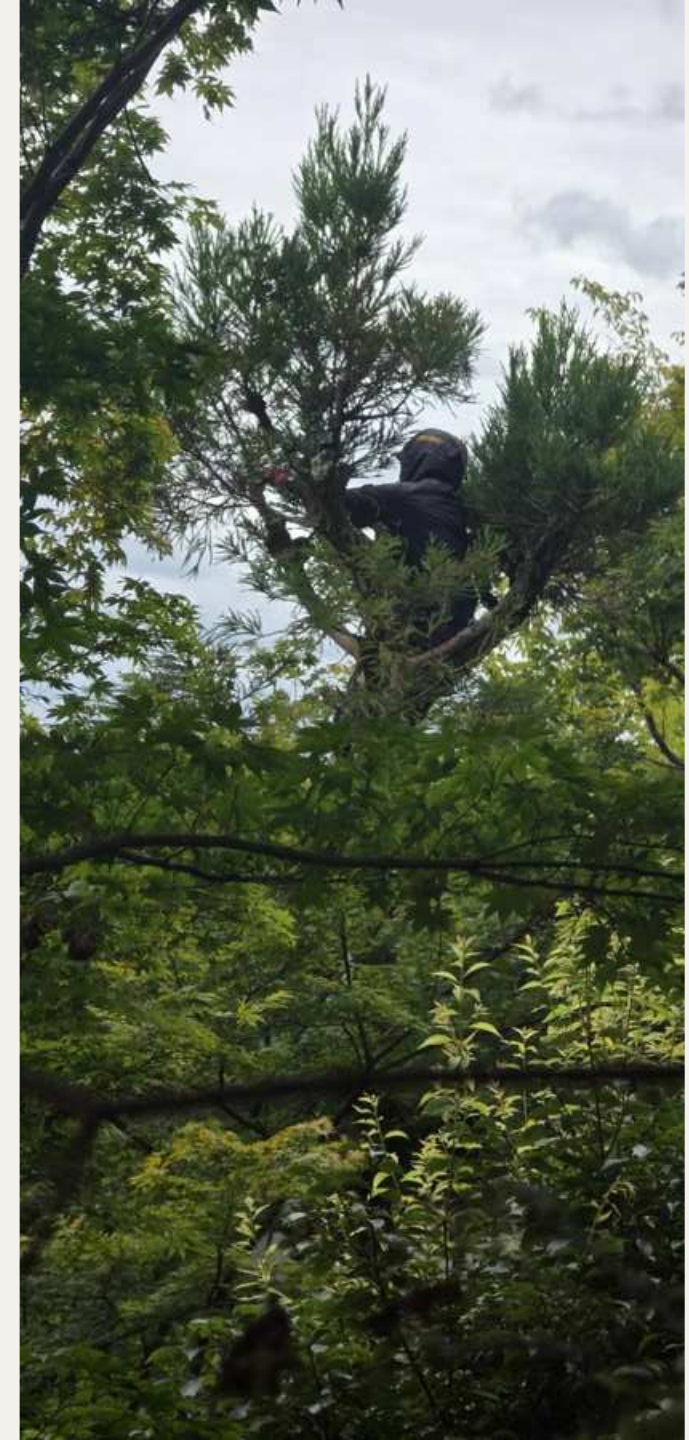

Cine observa ceva deosebit / neobisnuit ?

**Cineva este mereu
atent sa modeleze
si ingrijeasca
natura**

**Este o tehnică
japoneză numită
miki-maki (幹巻き,
„înfășurarea
trunchiului”)
protectie cires**

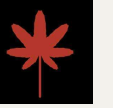

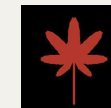

03

„Grădina nu se termină niciodată.”

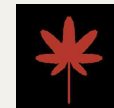

Un mod de a te integra, de a gândi, de a trai

Orice spatiu este insotit de arbori, plante, peisaj

Concept de amenajar urban

04

„Livada de ceai”

Matcha este o pudră fină obținută din măcinarea integrală a frunzelor de ceai verde provenite exclusiv din planta *Camelia sinensis* L.

Deși toate tipurile de ceai (alb, verde, oolong, negru) provin din această plantă, matcha se remarcă printr-o metodă unică și laborioasă de cultivare și procesare specifică Japoniei.

Siseme de umbrire - acoperit

Siseme de umbrire - descoperit

Kaki on the way

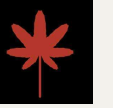

05

„Cultura ... de lotus”

Lotus pe ape limpezi

Floarea si fructul de lotus

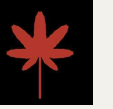

06

„Oare exista gazon in
Japonia?”

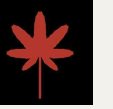

....

Natural sau artificial? Real ori ireal ?

Umбра si lumina, contrast si eleganta

O piatra prinde viata

Atentie la detalii !

Totul este 'perfect' ... natural

Pe unde ne-au mai dus pasii

07

„Japonia o gradina”

Gradina Botanica din Kyoto sistem de umbrire la bujor

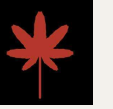

Colectia de bujori din gradina botanica Kyoto

Tip de pergola pentru trandafirii urcatori

Pergole in legumicultura ???

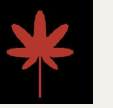

0 idee pentru Toamna Horticola Bucuresteană !

Vegetalizare cladiri

Compozitie de toamna

Solutii de mentinere a bambusului 'pe loc'... sau nu

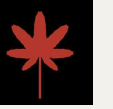

Mergand pe firul apei

Mai pe ocolite ... direct. Intortocheate caile Domnului

Colectia de glycine, sisteme de sustinere si un peisaj magic in devenire

08

„Fructele la mare pret
in Japonia?”

....

Scump Domle !

09

„Gradina urbana...si
comunitara?”

....

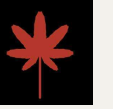

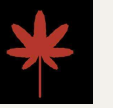

10

„Tokyo sub lupa unui
carcotas”

Gradina de Est - Palatul regal din Tokyo

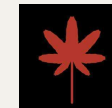

Tokyo la inaltime

New York / Tokyo ? Pe jos prin centru

Terase cultivate la inaltime

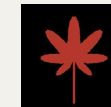

Solutii inteligente pentru protectia malurilor si vegetalizare urbana

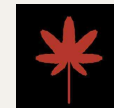

11

„Gradina Botanica din
Tokyo”

Sistem de aerisire sera

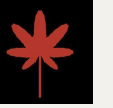

Am gasit Marul lui Newton

Newton's apple tree

In a famous anecdote, Sir Isaac Newton is credited with discovering the law of gravity after he saw an apple falling from a tree. Newton's apple tree in the Botanical Gardens is a graft originating from the apple tree in Newton's home responsible for this discovery. It was given to Y. Shibata, the former President of the Japan Academy, through the courtesy of Sir G. Sutherland, former Director of the National Physical Laboratory, England, in 1964. Unfortunately, this tree suffered from a viral disease, but was cured and rooted in the Botanical Gardens in 1981.

Colectia de ciresi

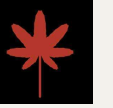

12

„Osaka-un altfel de
Japonie”

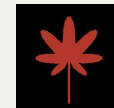

Gradina japoneza a castelului Osaka

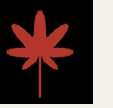

Si Osaka privita din castel

Noua ne pasa ! Un alt fel de a gandi de a trai in societate

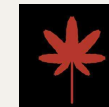

Dambovita de Osaka ☺

La multi ani Domnule PROFESOR !

Mulumesc Ana si colegilor care au facut posibila o experienta de neuitat

**Si am incalecat pe o sa ...
si v-am spus povestea
mea**

あ り が と う

Mulțumesc!
